

A How to Podcast Document Primer.

For all the iTunes users: we have the ability to push to you, the latest news from St. Lucas as it is posted on our web site.

Multimedia Pages are used in our Resources area for Sermons and the St. Lucas News.

Within the Multimedia pages of the site there are little  podcast icons. There will be one general icon at the top of the page and one in each series group. If you have iTunes you may subscribe to all the series, or just an individual series on that multimedia page.

You may at any time within iTunes unsubscribe to any series you have subscribed to.

A subscription to podcasts means that if you are using your iTunes program to listen to music or watch videos, any time a new entry is made on a site where you have a subscription, the file posted will automatically be downloaded for listening or viewing to your iTunes library. You would not have to keep checking the website for a newly posted file, but the new posts will automatically be pushed to your computer.
